

CATALOG CONCIERGE

Wynn Valentine

A full-catalog discovery and consistency review across active series, priority reader questions, technical signals, and the external author footprint.

SERVICE	REPORT DATE	SCOPE
Catalog Concierge	October 1, 2026	60 questions / up to 20 books

Baseline: 61 / 100

Wynn's website is stronger than the author's public footprint. The catalog opportunity is to establish one definitive current source, remove technical contradictions, and align outside profiles with the books being promoted now.

Watermarked demonstration report. Findings are based on publicly accessible information observed on the report date.

A strong home base with a source-of-truth problem

The official site has clear positioning and several well-built series pages. The larger web still contains older catalog emphasis, stale latest-book claims, and a dead indexed page.

WHAT IS WORKING

- Clear genre positioning and distinctive series promises.
- Visible reading order on four priority series pages.
- Useful Person, WebSite, BookSeries, ItemList, and Book schema.
- Search crawlers are allowed while the training crawler is blocked.

WHAT COSTS VISIBILITY

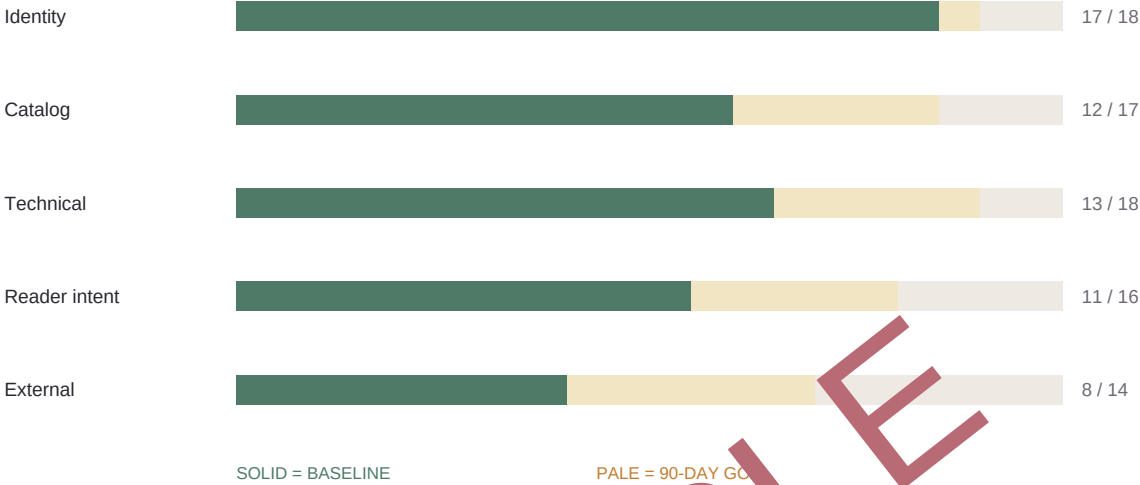

- No definitive complete catalog or current reading-order hub.
- Third-party sources emphasize older books.
- My Boyfriend canonical points to the homepage.
- An indexed Hearts & Crust result ends at a 404.

Best next move

Create one official Books & Reading Order hub, repair href URL contradictions, and update the profiles most likely to teach answer engines about Wynn's catalog.

61 / 100 with fast gains available

Talk of the Bot's internal score is transparent and repeatable. It is not an industry certification.

How to read the score

The catalog is understandable once the correct official page is found. The lower score reflects incomplete full-catalog coverage, technical contradictions, and inconsistent public profiles - all of which can be measured again.

Broad enough to expose catalog drift

Catalog Concierge distributes questions across the areas most likely to affect discovery and reader confidence.

GROUP	COUNT	WHAT IT TESTS
Identity and genres	8	Bio, genre, pen-name identity
Series and reading order	14	Start points, sequence, standalone status
Book-level fit	14	Tropes, tone, heat, setting, protagonist
Availability and releases	10	Latest, next, free, format, retailer
Unbranded discovery	10	Queries before a reader knows Wynn
Trust and source quality	4	Official citations and conflicting sources

The 60-question log preserves the exact wording, answer, sources, date, status, and reviewer note. The client report summarizes the decisions; the audit log preserves the evidence.

SAMPLE

Six priorities, one fragmented public story

The official site prioritizes a different set of books than many external profiles.

SERIES	CURRENT PROMISE	SOURCE STATUS
Kitchen Line	Pickleball cozy mysteries	Strong official page
The Crooked Quire	Living-bookshop cozy fantasy	Strong official page
Gloamsbury	Linked paranormal holiday cozies	Strong official page
Kettlewick Weekends	Closed-door romcom quick reads	Strong official page
Merry Hollow	Whimsical holiday cozy mysteries	Needs series schema
My Boyfriend	Animal-shifter romantic comedies	Canonical and sitemap fixes

Catalog drift

External sources often foreground legacy paranormal romance, science fiction, and older cozy series. That history is valuable, but it should not obscure the books Wynn is actively promoting now.

Where the trail works - and where it breaks

Specific branded questions perform better than broad discovery or full-catalog questions.

QUESTION	OBSERVED RESULT	RATING
Who is Wynn and what does she write?	Official answer is clear.	STRONG
Kitchen Line reading order?	Official page is a dependable source.	STRONG
What is the newest Wynn book?	A third-party result presented a 2025 title as latest.	WEAK
Does Wynn have a free book?	Current free prequel competes with a stale 404 result.	WEAK
Best pickleball cozy mysteries?	Wynn was not prominent in sampled broad results.	OPPORTUNITY
Living-bookshop cozy fantasy?	General lists and community pages dominated.	OPPORTUNITY
Paranormal holiday cozy books?	Gloamsbury fits but did not surface prominently.	OPPORTUNITY

SAMPLE

Six precise fixes

The site is crawlable and structurally stronger than average. These repairs remove contradictory machine signals.

PRIORITY	ISSUE	ACTION
P0	My Boyfriend canonical	Set it to its own URL.
P0	Sitemap omission	Add My Boyfriend.
P0	Indexed 404	Restore or redirect Hearth & Crust.
P1	Trailing-slash mismatch	Align canonical, sitemap, internal links, and schema to final 200 URLs.
P1	Thin series schema	Add verified BookSeries, ItemList, and Book entities to Merry Hollow and My Boyfriend.
P2	Accented anchor	Use a stable ASCII anchor for A Piece of Trouble.

Only add publication dates, formats, identifiers, and availability to structured data when each fact is verified.

SAMPLE

Build the official Books & Reading Order hub

This page should become the first-party answer for the catalog questions currently won by external databases.

1. Start here

Offer three labeled entry points: cozy mystery, cozy fantasy, and sweet or paranormal romance. Give each a one-sentence promise and first-book link.

2. Current and upcoming

List the newest release and next confirmed releases with exact dates, series, format, status, and a visible last-updated date.

3. Complete reading order

List every active series in order. Mark prequels, bonus stories, standalones, and sequential books explicitly.

4. Backlist

Preserve legacy books without letting them blur the current brand. Organize them by series and genre with an archival label where useful.

Source-of-truth rule

Every priority book should have one stable official URL and one verified statement of title, series position, genre, tone, release status, and purchase path.

SAMPLE

Make reader-fit questions explicit

Each series page should answer the same core questions using series-specific language.

READER QUESTION	PAGE REQUIREMENT
What order should I read the books?	Show sequence and prequel placement.
Can each book stand alone?	Say yes, no, or best in order.
What is the tone and heat level?	Use direct reader language.
Which book should I start with?	Give one confident entry point.
Where can I buy or read the books?	Link verified formats and stores.
When is the next book coming?	Use exact confirmed date and update visibly.

Visible reader copy comes first. Structured FAQ data should only repeat what the reader can actually see on the page.

SAMPLE

One consistent description across the web

The wording can flex by platform; the core facts should not.

CANONICAL ONE-SENTENCE BIO

Wynn Valentine writes warm, witty cozy mysteries, sweet romantic comedies, and magical adventures featuring clever clues, found family, playful worlds, and a guaranteed soft place to land.

WHAT DOES WYNN VALENTINE WRITE?

Wynn Valentine writes cozy mysteries, cozy fantasy, paranormal holiday adventures, and closed-door romantic comedies. Her books favor warmth, humor, found family, imaginative settings, and satisfying endings over graphic violence or on-page heat.

WHERE SHOULD A NEW READER START?

Start with Zero Zero Two for a free introduction to the Kitchen Line Mysteries. For cozy fantasy, begin with A Labyrinth of Paper and Paw. For small-town romantic comedy quick reads, choose any Kettlewick Weekend.

Consistency rule

Conflicting genre, heat, release, and series-on-or-claim cause more harm than small stylistic differences.

Catalog Concierge turns findings into action

This tier includes help with two high-priority improvements during the reporting period.

Improvement 1 - Repair the source signals

- Correct the My Boyfriend canonical and sitemap entry.
- Resolve the indexed Hearth & Crust 404.
- Align preferred URL formatting across canonicals, sitemap, links, and schema.

Improvement 2 - Publish the catalog hub

- Create Start Here, Current & Upcoming, Reading Order, and Backlist sections.
- Give every active series a verified, stable destination.
- Link the hub from the homepage, footer, About page, and controllable profiles.

Approval before action

Talk of the Bot drafts and verifies. Wynn approves public-facing copy, redirects, profile edits, and catalog priorities before they go live.

SAMPLE

The baseline becomes a business record

Targets are shown as targets. Each future report replaces them with observed monthly results.

The report records gains and regressions. A rising number without better answers, stronger sources, and resolved errors does not count as progress.

Fix truth first, then grow reach

The work is sequenced so the public footprint points back to a stable official source.

WHEN	ACTION	DELIVERABLE
Days 1-3	Correct canonicals, sitemap URLs, and redirects.	Clean technical release
Days 4-7	Add verified series schema to missing priority pages.	Stronger entity coverage
Days 8-14	Publish Books & Reading Order hub.	One canonical catalog
Days 15-21	Add series FAQs and three niche topic pages.	Reader-intent coverage
Days 22-30	Update controllable profiles and request stale-data corrections.	Aligned public footprint

Monthly review call agenda

- What changed since the last report?
- Which answers became more accurate or less accurate?
- Which two improvements should be approved next?
